## WORK EXPERIENCE

### Full stack web developer

**T-Innova** T-Innova Ingeniería Aplicada | March 2022 - March 2023

- Managed SQL databases (queries, stored procedures, and jobs).
- Developed a C# project integrated into a sports center management system.
- Maintained an intranet using HTML, CSS, PHP, JS and interacting with APIS.
- Built a BackOffice web application with a Laravel backend and a React.js/Redux frontend.
- Direct client interaction.

### Back-end web developer

**adnovation** Adnovation | April 2023 - Present

- Worked in different projects builded with modern php and Symfony, including REST APIs, landings portals, payment flows and client data management.
- BDD and automated TDD testing.
- SQL and non-relational databases like Mongo.
- Clean code architecture and error control with platforms like Sentry.
- Worked with both Kanban and Scrum methodologies, used Jira and Bitbucket.
