### WORK EXPERIENCE

#### Back-end web developer

 Mytheresa | February 2025 - Present

- Designing and developing high-performance microservices using Golang alongside a large-scale Symfony ecosystem.
- Orchestrating cloud infrastructure and deployments using Kubernetes, Helm, and AWS.
- Optimizing architecture for a high-traffic luxury fashion e-commerce platform to ensure reliability and scalability.

#### Back-end web developer

 Adnovation | April 2023 - February 2025

- Developed scalable web solutions with Modern PHP and Symfony, handling complex payment flows and REST APIs.
- Implemented Clean Architecture principles ensuring quality through automated TDD/BDD and error monitoring with Sentry.
- Managed data consistency across both SQL and NoSQL (MongoDB) databases within an Agile (Scrum/Kanban) environment.

#### Full stack web developer

 T-Innova | March 2022 - March 2023

- Engineered a comprehensive BackOffice web application using Laravel and React.js/Redux.
- Maintained and integrated internal systems (Intranet, Sports Center Management) using C#, PHP, and front-end technologies
- Managed SQL database performance via stored procedures and handled direct client technical requirements.

### ACADEMIC BACKGROUND

#### Institut Mediterrània

French Baccalaureate in Science | 2017 - 2020

#### CEFP Núria

Web Application Development | 2021 - 2023

### BACKEND

PHP / Laravel / Symfony  
Golang  
Kubernetes, helm  
AWS  
C#, node.js

### FRONTEND

Basic stack: HTML, CSS, JS  
React  
Next.js
